-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kodama masayoshi (JP 09-152569) in view of Honma (US Publication No. 2006/0145711).

Kodama masayoshi ('569) in view of Honma ('711) 's teaching which meets the claimed invention was discussed in the paragraph 1 of the previous office action dated on 3/26/07 and is maintained.

Response to Arguments

2. Applicant's arguments filed 6/26/07 have been fully considered but they are not persuasive.

Applicants argued that Honma ('711) does not provide any teaching or suggestion from which one skilled in the art would arrive at the notion of contacting the edge of a substrate. Applicants also argued that one skilled in the art in view of the optical sensor of Masayoshi ('569), would apply the notion of "contact operation" taken from Hanma ('711) to arrive at the claimed subject matter of detecting the edge of substrate contacting the edge of the substrate.

The examiner disagrees with applicants' assertion and points out that the edge detection was clearly taught by masayoshi ('569)'s non contact edge sensors (3a-3d) and Honma ('711) reference is used to show that a non -contact sensor can be replaced by a contact sensor (see Col. 3, paragraph [0024], last four lines "the displace sensor 11 is not limited to such a non-contact sensor but instead can be of a contact sensor"). Therefore, one of ordinary skill in the art would be motivated to replace the non-contact edge sensors (3a-3d) of Masayoshi ('569) by a contact sensor as disclosed by Honma ('711) and arrive at the claimed subject matter of detecting the edge of substrate by contacting the edge of the substrate.

THIS ACTION IS MADE FINAL.

3. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed; and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
